

Batteries Capacitors and Timing Spark Gap Circuits

From the green copper tree tops to the dark iron roots in the ground, there is a carbon coil dendrochronological geo-electric battery in every tree. The baghdad battery takes geo magnetism and turns it inside out. Could these static electrolytic capacitors have been coulomb temperature aware? Maybe Red Green and Blue firework effects? Best eat some melatonin found in colored flowers and find out whether you are grateful to be dead or not. ~/- Asphalt cathodic/anodic batteries work in the gamma ray spectrum creating nanosecond pulse charge capacitances. The electrolyte presumably contains anti static or anti ionic solutions. Combined with Tesla coil configurations in sacred geometric shapes, it's any wonder secret societies are as mad as a hatter.

1825/30 N.Y Militia Top Hat Manhattan lined hats with felt and mercury, creating a gravity sensitive, thermal reactive capacitor and when war came, they adopted furry feathers as static electric chargers, in a similar manner to the roman praetorian helmet. Torqs, Togas and necklaces share similar electric field properties. It's anybody's guess as to exactly how these military secrets worked or where. Mountains, trees, or valleys. Shell shocks and short sightedness are possible on battlefields.

John Brant and the Indian Feather in your Cap Aeon Flux has nothing on John Brant. Ahyonwaeghs are sometimes pronounced Ah! You Wiggs! The Wiggs go way back, all the way back to ancient Egypt and in modern times they've been found in British Parliamentary head dress attire. Democrats, Republicans and Whigs were dominant USA parties. In the 1680s through 1850s whigs ran governments in the U.K.. Could this picture be the real deal? Visit the Joseph Brant museum in Burlington Ontario.

Seen from space on Google maps are remnants to a civilization that once was, possibly covered over by a great ice age, or ice flow. The whole area has pock marks to well trodden circles along winding roads. Winters in the recent past have been harsh, and some might suspect they caused wars as vast migrations abandoned old settlements to find new. You decide! This after all might have nothing to do with Des Troit, and Three Rivers, but instead may be the pulp and paper industry, sans windmills.

MonoCulturalism in Commercial Beverages !.. (+-) !..

Alcoholic beverages quality standards before prohibition contained less than 0.5% alcohol by the law. At the time, General grocers carried everything from radioactive toothpastes to snake oil cures. Thousands to years prior, rotten fruits and vegetables had thier risk.

Wine Coca Legends and Glass Bottle Antiques Glass discharges static fields. RadioStatics, MagnetoStatics, ElectroStatics and HydroStatics. Bottles were produced in SE Asia around 100 B.C., and in the Roman Empire around 1 AD. My headaches are different from yours and there are over 200 headache medical definitions. Status migrainosus is static accumulating material migrating through the brain. Use glass bottle dispensers at the next wigwam. en.wikipedia.org : tinyurl.com/a32yf2u

70 Flavors Soft Drinks Dispenser @ Wendy's

Sit down and refill to pick up where yellow dye number 5 hollywood myths left us hanging. Some colors in our bodies react differently to different colors and flavors. Get sensitive. I recommend Frankenberry!

Humans see Hues Rainbow Warriors in a Universe with over 11 strings and over 8 magic Schools. Additive (Pigment) CMYK is Cyan Magenta Yellow. Subtractive (Light) RGB is Red Green Blue and White. It's more complicated than that! In the meantime, rubik's cube competitions youtu.be/QM891_SG4EY

5 Chinese Elements / The Dog Star Jin (metal), Mu (wood), Shui (water), Huo (fire), Tu (earth) are Confusing isn't it? Nowadays we call fire, plasma and the search for quarks, geoneutrinos and all other things star trek remains elusive. Fluoride (Ions), Calcium (Magnetism), Tin (Altimetry), Copper (electric), Indium (Quantum) may be even more complicated. 5 point stars.

Seeds and Heavy Metals Absorptions Peanut butter was once rare, and thanks to the "Real McCoy" this american scientist George Carver Washington brought peanut farms to the masses so that those intoxicated by heavy metals might live the good life. When seeds in soil grow, they need water and minerals. Specifically, copper, iron, and other metals. When we eat those seeds, and this includes butters from peanuts, that are in fact a seed from a plant, they absorb those similar metals and minerals from our bodies lower toxic heavy metals loads.

SPONTANEOUS GOLD NANOPARTICLES

Here in, aqueous stable, silver and gold nanoparticles (Ag & AuNPs) using naturally occurring amino acid conjugated sodium salt (NaTC Sodium taurocholate is a bile salt) and glycocholate (NaGC Glycocholic acid, or cholyglycine, is a crystalline bile acid involved in the emulsification of fats.) as reducing and capping agents. In layman's terms. Get a Hershey's bar with quality milk ingredients that boosts your gallbladder secretions. Break down hard chunky and disastrously large gold bits. Soybean extracts (10 to 25nm), Aspartic acid 17 to 33nm, Black Darjeeling tea 24 to 48nm Korean red ginseng 2 to 40nm, Mucuna pruriens 6 to 17.5nm, Red grape pomace 5 to 10nm, Coriander 6.7 to 57.9nm, Lemongrass 100 to 200nm, Bile Salts 4 to 30nm.

Our sun compared to others is shockingly small. The solar maximum and minimum ejects matter charged with ions so strong darkness appears. UV Scuti is 17,000x bigger. BetelGuisse and Antares are both about 700x larger than our sun diameter, all sitting within our galaxy. Planetary scientists concede nuclear fusion is at play. Could immense pressure baro downing at the core create absolute stillness and absolute coldness? thesuntoday.org/the-sun/solar-structure/

Elephants Speak as Humans Do : Using Trunk to Shape Sound

Elephas Maximus! These large brained intelligent beings with extra sensory perception (ESP) now speak Korean and English using thier trunks to articulate Oratorically! youtube.com : tinyurl.com/y4ju7ye5 Muse is a root word to music, and to amuse is to gracefully slip away from a sweet embrace. Elephant to the right is in must. Thick tar-like secretion is forced out clearing the brain for better performance. Stress is caused by "junk in the trunk" and crying although disabling at first is rejuvenating. etymonline.com : tinyurl.com/y38ooxz3

Totems, Togas, Torqs, Touche, and Spark Discharging

Green leaves are high in copper, and tree roots are high in iron. These two elements together create batteries in consumer electronics. In nature it is no different as the rings inside silver maples (*Acer saccharinum*), and silver trees (*Leucadendron argenteum*), carry sugars and from the top to the bottom upwards 50volts can be measured. Totem poles are similar to the privateers crow's nest. A vantage point. The warrior to the left is Haida and carries two wooden "drum sticks", wears a full fur vest, leather shoes and a metallic helmet. Which battlefield do you suppose this gentleman was thrust into? historymuseum.ca : tinyurl.com/y22xsk8k

"a person's a person no matter how small"

Alum, Moola, Moulin Rouge and the Are you Jelly Donut Generation

Mr Tiny Tim and Mr Tim Hortons both brought us donuts. Horton is a root word to Horticulturalism and Canadian founding industries preserved historical tradition in shapes, colors and sizes. Japanese donuts, powdered jellies and possibly general Tso's chicken, all have two things in common. Deep fat fryers and the color red. Red Currants, strawberries or artificial aluminiums make red, and some donuts are cooked using alum inside deep fat fryers. Alum is a chemical compound made from aluminum. Unfortunately, people forgot how to spell aluminium and used it, rather than food safe alut! Say it backwards! Moola! Ah yes. Salut! Go watch the movie. youtu.be/RQa7SvVcDZk

Food safe Alum
